

D&B Payment Performance Insights

Exclusively available to Global Trade Exchange Program providers, this user-friendly platform provides deep insight on global payment information.

D&B Payment Performance Insights blends your company's accounts receivable data with Dun & Bradstreet's industry-leading data and analytics to help you understand customer payment performance and ultimately reduce overall delinquency.

WHEN YOU NEED TO ENRICH YOUR CASH MANAGEMENT STRATEGY

D&B Payment Performance Insights can help you view and analyze your accounts portfolio to enrich your cash management strategy. The Comparative Payment Behavior chart displays your A/R against the Dun & Bradstreet payment universe to show how your customers pay you versus how they pay other vendors and industry peers – not just in the past 30 days but at a 3-month and 12-month view. This level of insight into past payment performance allows you to identify potential collection risks and opportunities. For example, if a customer is paying you on time for smaller invoices but pays other vendors late for larger invoices, you'll be more informed about how much credit you can likely expect to collect in a timely manner.

WHEN YOU NEED TO REFINE YOUR COMPANY'S CREDIT POLICIES

Being able to compare your customers' payment behavior against how they pay everyone else can help your company set more precise credit policies, which are integral to proactive account management and optimizing cash flow. Knowing how others in the industry are getting paid provides a "behind the scenes" look that you can't get anywhere else. So no matter your industry, invoice size, or hierarchy of suppliers, continually refining your credit policy to remain agile and set the most profitable terms is a surefire way to grow as a credit department.

WHEN YOU NEED STRONGER ACCOUNT MANAGEMENT

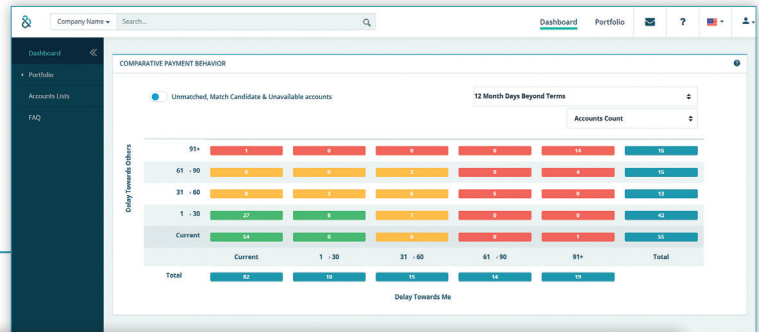

Blending your company's A/R data with D&B's provides a current snapshot of your accounts portfolio at the global level. You can drill down to identify industry and corporate exposure and data is displayed by outstanding dollars and number of accounts. D&B Payment Performance Insights also provides exclusive benchmarking charts such as the Portfolio Days Beyond Terms Trends that maps an account's DBT to you, to others, and to the industry as a whole. Having the ability to view your data against D&B's allows your company to have a greater insight into account management and trends, and ultimately improve customer payment performance and reduce delinquency.

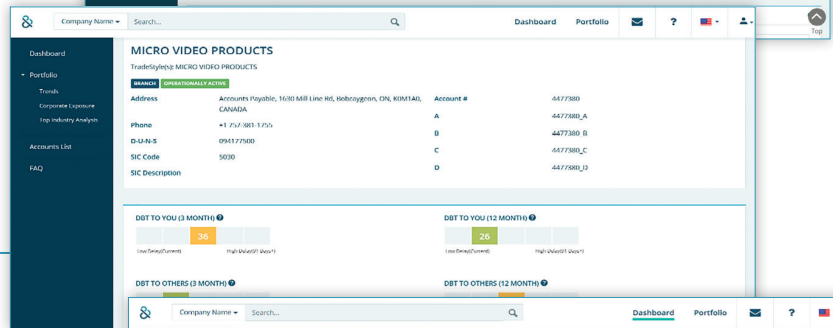

D&B Payment Performance Insights provides exclusive data and analytics to help you ultimately reduce overall customer delinquency.
