GROWING RELATIONSHIPS THROUGH DATA

Use D&B's unrivalled global, online business database to give you the full picture of a business, minimising risk to your organisation.

If you have responsibility in your company for fraud detection, regulatory compliance, research, business development, or strategy and planning, you understand the importance of having access to all businesses in order to gain a complete picture of customers and prospects. It's difficult to get timely, accurate information about businesses and to trace corporate hierarchies. Using multiple sources of information is expensive and inefficient.

Fortunately, D&B's Global Reference Solution can help.

Global Reference Solution is the only comprehensive source of information on 245 million businesses worldwide. The database is refreshed daily, so you always have access to the most up-to-date information, giving you confidence when you need to make a business critical decision. You can access global reference solutions through a simple user friendly web interface.

WHY GLOBAL REFERENCE SOLUTION?

D&B's Global Reference Solution gives you access to worldwide information that will help your company detect fraud and comply with regulations. It also helps you address a broad range of other business issues. Global Reference Solution also provides you with:

- Coverage – unrivalled access to over 245 million global businesses. No other provider can give you access to information on as many businesses
- Daily data refresh – provides you with accurate data everyday so that you can ensure you make business critical decisions with confidence
- Corporate linkage – allowing you to understand the broader picture of the risks your business may be exposed to
- Data quality – providing you with information which has gone through our DUNSRight™ Quality Process.

D&B's proprietary DUNSRight™ Quality Process is how we collect and enhance information for all D&B solutions. DUNSRight means information you can trust.
