

# Data Integration Toolkit

---

## The Challenge

Take the complexity out of integrating data across your systems and applications.

## The Solution & Result

The Data Integration Toolkit lets you tap into D&B's world's largest commercial database from your corporate applications through a simple web-based interface. Integrate up-to-the-moment commercial data on businesses worldwide into your enterprise business applications, and give your managers instant access to the insights they need to make the best decisions.

---

## Product Summary

D&B's Data Integration Toolkit is an easy and flexible way to build access to the business intelligence you need. The toolkit makes integrating data directly into your own systems and applications easy and cost-effective. It uses standard Internet technologies enabling you to access enterprise-wide business intelligence quickly and efficiently.

---

## Benefits

- ✓ Unique application to interface with D&B and automate the integration of D&B information.
  - ✓ Easier data integration.
  - ✓ Access to world-class data in real-time.
  - ✓ Automated systems that free up valuable resources.
- 

## Features

- ✓ Use your own XML tools or go to the Data Integration Toolkit website and download a COM or Java Toolkit containing pre-developed code.
  - ✓ Access consistent data from around the world via one unified platform to minimize local and regional differences.
