

Confident decisions begin with you and i

DNBi® Risk Management – US Premium Edition™

With information on more than 164 million businesses, *DNBi Risk Management – US Premium Edition* allows you to access, evaluate, manage, and monitor critical business insight so that you can make confident decisions to manage risk across your entire portfolio.

Gain confidence with real-time, quality D&B data

With *DNBi US Premium Edition*, you have the power of real-time insight to help you make more informed, efficient, and confident credit risk decisions. Confidence comes from quality. DUNSRight® is our innovative, patent-pending process that transforms business data—yours and ours—into decision-ready insight, presented in an easy-to-navigate, Web-based format that gives you control and makes your work life easier.

Plan with confidence using predictive indicators and scorecards

Predictive information provides insight on how businesses are likely to behave in the future—e.g., likelihood to pay slowly, experience business failure, respond to an offer, purchase a product, or be engaged in fraudulent activities.

Predictive scoring uses historical information to predict future outcomes. It involves identifying the risks inherent in a future decision by examining the relationship between historical information and the future event. Predictive scoring allows you to rank accounts based on the probability of an event occurring in the future.

Scores available through *DNBi US Premium Edition* include D&B's industry-standard Commercial Credit Score (CCS) and Financial Stress Score (FSS).

Keep informed with alerts and portfolio monitoring

One of the most powerful benefits of *DNBi US Premium Edition* is that it lets you easily monitor your customers with News & Alerts—in fact, it does it for you! You can create group folders to manage similar companies—by region, industry, and level of risk, for example.

Customize your alerts and DNBi does the rest: you automatically receive updates on every company in your portfolio.

Know the family with *Corporate Linkage*

Using our exclusive D-U-N-S® Number, D&B links corporate family structures to help you understand total corporate risk and opportunity with any given company. Within a corporate “family,” headquarters, branches, parents, and subsidiaries are all viewed in terms of their relationship to other members of the same “family tree.”

Understanding these relationships can help you aggregate total risk exposures, uncover new selling opportunities, avoid conflict-of-interest situations, perform merger and market analysis, and more.

See only what's important with filters

Save time by creating formula-based filters using a wide range of variables. Filters that you create can be applied to reports, exports, and lists of credit files, to ensure that you are evaluating only the information that is meaningful to you.

Follow the trends with *Detailed Trade Risk Insight*

With *Detailed Trade Risk Insight for DNBi*, you have access to more detailed reporting of a company's trade payment performance through recent month-to-month payment trends. With updates on more than 1.5 billion commercial trade experiences, our commercial database lets you identify changes or trends in payment behavior to make more confident credit decisions.

Get the latest financial news with *Live Reports*

Searching online for financial information and news to help you minimize credit risk can be exhausting. With *DNBi Live Reports*, you can find vital financial information and news in one place with the breadth and depth of data you've come to expect from D&B.

You also have immediate access to qualitative company coverage right in the Company Summary tab. D&B's news delivery partner, FirstRain—a leader in search-driven research and analytics—checks for duplicate content and groups headlines to make sense of the scattered content on the Web and delivers only high-quality information to your *DNBi Live Reports*.

DNBi Live Reports also includes an interactive stock chart and stock performance highlights that allow you to instantly view stock performance for public companies right from the DNBi platform. This feature is powered by EDGAR® Online, a leader in the online distribution of company data and public filings for equities, mutual funds, and a variety of other publicly traded assets.

Share your data with peers on *DNBi Credit Network (Beta)*

DNBi Credit Network (Beta) is an interactive, intelligent tool that helps you more effectively manage your portfolio and mitigate your company risk by allowing you to securely share payment experience information with trusted peers.

- Augment your knowledge of companies in D&B's database by requesting information from the *DNBi Credit Network* community

- Share insight and payment experience information about companies with other DNBi users
- Validate the creditworthiness of companies in D&B's database with thin trade files or non-current payment record information

Add confidence with powerful add-on modules

With add-on modules that carry you end-to-end through the risk management lifecycle, *DNBi US Premium Edition* is the most powerful on-demand solution for risk management—from application through monitoring to decisioning and beyond.

Based on a blend of your accounts receivable data, the latest D&B business information, and optional expanded business bureau data, *DNBi US Premium Edition* gives you a more complete picture of each customer's credit risk. Automated account reviews are conducted each day to look for changes in the credit risk of each account, allowing you to take confident and immediate action.

Put *DNBi Risk Management* to work for you today

DNBi Risk Management continues to evolve to give you even more customization, more interactivity, and more user-friendly features in addition to an ever-expanding breadth of business information. With *DNBi Risk Management* and its add-on modules, you'll make faster, more efficient, and more confident credit risk decisions.
