COMPLIANCE INTELLIGENCE

An intelligent KYC/KYB monitoring and  
assessment solution for future-ready  
compliance risk mitigation

# Introducing Dun & Bradstreet's New Policy-Driven Compliance Risk Management and Screening Solution

Compliance risks and regulations are growing more complex every year, and with it — growing costs associated with non-compliance.

With a backdrop of continued evolution of regulation and ever-increasing fines, compliance teams continue to struggle to balance their compliance requirements against cost and efficiency pressures.

Conducting proper due diligence requires numerous time and budget consuming processes, most of which require focus that draws away from direct risk mitigation.

The call for heightened due diligence and verifying business identity through multiple sources with limited resources and manual processes leaves compliance teams spread thin and companies at risk.

Compliance professionals need a way to continuously monitor compliance risks while reducing the time spent on manual processes, lengthy research, and unnecessary outreach — to best direct focus on risk-related situations before disruption occurs.

D&B Risk Analytics – Compliance Intelligence is an ongoing KYC/KYB monitoring and compliance decision making solution driven by Dun & Bradstreet's AI-powered data and fit with a unique policy-led risk engine that allows compliance teams to better highlight material risk and greatly reduce workloads while improving the intelligence of risk decisions.

This cloud-based solution leverages Dun & Bradstreet's best-in-class compliance risk data to help drive informed decisions and delivers unprecedented visibility throughout business relationship lifecycles via continuous third-party risk monitoring.

## D&B Risk Analytics

COMPLIANCE INTELLIGENCE

A comprehensive, policy-driven solution to:

Verify and Identify Entities

Screen Business Partners during Onboarding

Expedite Risk Analysis and Decisioning with Automation

Assess and Report Compliance Risk

Continuously Monitor Third-Party Risk of your Portfolio

# Build the Defensibility of your Compliance Program with Robust Compliance Risk Insights

Connected to the Dun & Bradstreet Data Cloud, D&B Compliance Intelligence brings you key risk insights from over 10,000 trusted global sources covering over 500 million entities all in one solution — reducing the time and effort needed to conduct research.

With data refreshes conducted in near real-time, you'll be sure you have the materials, services, and partners to:

- Streamline your onboarding process
- Quickly identify and verify entities and people your company looks to do business with
- Define risk relevancy and materiality based on your company's specific risk policies
- Monitor changes to business partners so you can proactively mitigate risk
- Highlight your riskiest areas are to mitigate
- Regularly screen business partners against sanctions and watchlists, PEP lists, adverse media

In addition, restricted party screening capabilities help businesses perform regulatory risk checks on executives and principals with ease by leveraging data from another trusted global provider, Dow Jones.

## Restricted Party Screening

### SANCTIONS AND WATCHLISTS

Detects, prevents, and manages sanctions risk of people and/or entity-level associated with Anti-Money Laundering (AML), Anti-Bribery and Corruption (ABC), terrorism, terrorist financing, narco-trafficking, war crimes, and economic sanctions

### SPECIAL INTEREST PERSONS

Provides global media coverage of individuals involved in a legal process for serious crimes such as financial crime, tax crime, organized crime, corruption, trafficking, and terrorism financing

### ADVERSE MEDIA ENTITIES

Focuses on companies with a corporate structure and commercial purpose that may have had adverse/negative media coverage on regulatory, competitive, financial, environmental, production, social, and labor-related topics

# Automate Compliance Risk and Screening via Policy-Led Risk Engine

D&B Compliance Intelligence is built around a highly configurable policy-led screening workflow, allowing you to define risk that is most relevant to your company's compliance policies and identify that risk on an automated basis through compliance risk insights from the Dun & Bradstreet Data Cloud.

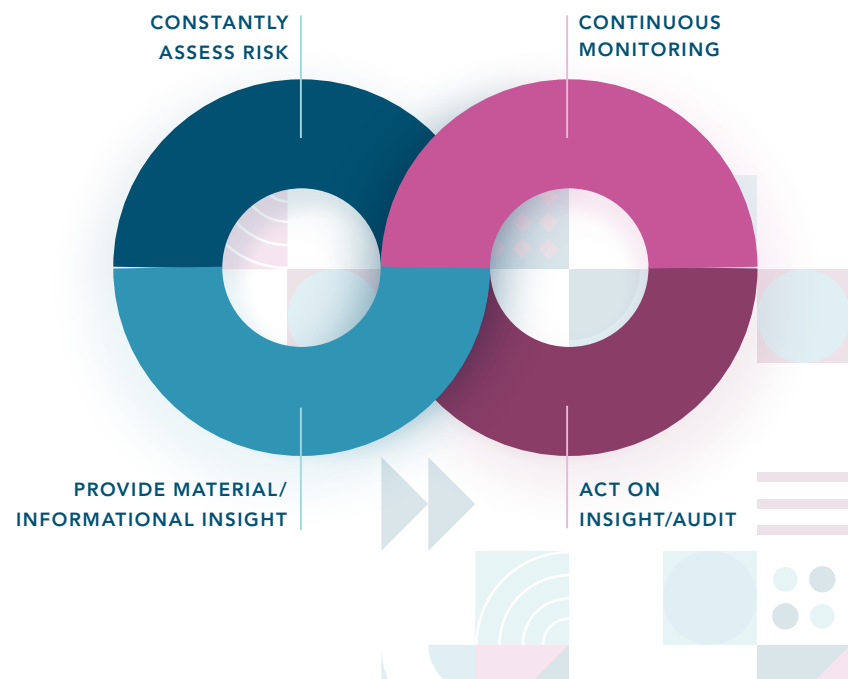

This capability helps you to:

- Automate restricted party screening and false-positive management
- Proactively identify risk-relevant events defined by your policy settings
- Reduce manual labor, time, and effort of conducting due diligence
- Accelerate decisioning for quicker time to revenue and risk assessments
- Leverage ongoing monitoring strategies to avoid risk gaps during periodic assessments

## Traditional KYC vs Ongoing KYC Monitoring Approaches

Traditional KYC approaches call for periodic compliance risk reviews at a routine cadence and capture a snapshot of risk during that period of time. The grim truth is that *risk factors shift* more frequently than this process can keep up with, leaving *potential risks* between periodic reviews.

**ONGOING KYC/KYB MONITORING FROM DUN & BRADSTREET** allows you to assess the risk of your customers and business partners on a continuous basis, alerting you in near real-time when risk factors shift — rather than only analyzing risk during periodic KYC reviews.

## Ad Hoc Screening

*Built for Speed*

D&B Compliance Intelligence is also equipped with an Ad Hoc Screening function, allowing you to instantly screen entities at a high level when time is of the essence

# Risk Scores, Rankings, and Ratings

D&B Compliance Intelligence features numerous key risk indicators

## Country Risk

Provides a calculation when an entity is domiciled in a high-risk jurisdiction. The set default country risk in solution is based on Transparency International Guidance. Country Risk is a configurable attribute and can be set based on your company's policies.

## Industry Risk

Provides a calculation of risk based on specific industries organized via SIC code. Industry Risk is configurable attribute and can be set based on your company's policies.

## Entity Risk

Provides risk level based on attributes associated with your business partners including risk associated with number of employees, length of time business has existed, and management team associated with the entity. Entity Risk is configurable attribute and can be set based on your company's policies.

## D&B ESG Rankings\*

Provides an indication of an entities environmental, social, and governance performance that may directly affect the entities business health and performance as a business partner. This ranking is broken down into 31 topic specific levels spanning 13 key categories.

## D&B Cyber Risk Ratings\*

Provides an indication of a supplier's cyber security performance, powered by the global leader in cyber security ratings, SecurityScorecard. This Rating is broken down into 10 scored categories that help you easily understand your suppliers' level of cyber risk in specific key areas

\*D&B ESG Rankings and D&B Cyber Risk Ratings available in solution via add-on modules

# Key Capabilities and Functionality

## Verify and Enrich Entity Data

D&B Compliance Intelligence provides you with one source of truth for the data you need to verify and identify the right potential customers, business partners, and third parties including:

- Core Company Information
- Financial Insights
- Firmographics
- Ownership and Linkage
- Public Filings
- D-U-N-S Registered Verification
- Original registry documents\*

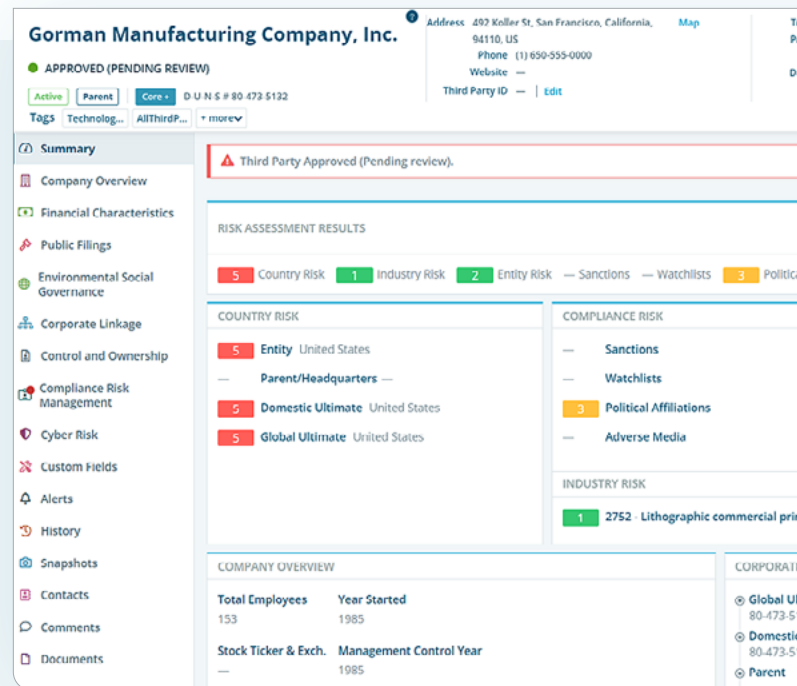

D&B Compliance Intelligence is powered by the world’s most comprehensive source of commercial business data for informed decision making, The Dun & Bradstreet Data Cloud, helping to eliminate the need for time consuming research and data validation between disparate sources.

## Automate Screening with Configurable Policy-Led Workflows

Define material risk via robust configurable risk policy settings covering sanctions, watchlists, adverse media, political affiliations, country risk, industry risk, entity risk, and more.

Automate screening of entities, beneficial owners, and trade styles based on configured policy settings to identify relevant risk via insights from the Dun & Bradstreet Data Cloud.

Reduce manual labor and save time by setting automated decisioning based on policy workflow rules.

Screening Subjects		
CURRENT RISK RESULTS
